

## Who's Who in the Zoo?

### Animal Assortment

**Beginner:** Take a trip to the zoo or use your imagination with toy animals. Identify different animals and sort them into groups.

**[Tip]:** Put all the bears together or sort animals by size.

**Intermediate:** Sort animals by how they move or how many legs they have.

**[Tip]:** Sort animals by whether they fly, swim, walk, or slither.

**Experienced:** Sort animals into specific categories.

**[Tip]:** Farm animals vs. household pets, reptile vs. non-reptile, carnivores vs. herbivores.

**Why is this important?** Making categories is fundamental to learning about and perceiving the world.
