

First, Next, Last . . .

How Does The Story Go?

**Beginner:** Tell a story using two pictures (by drawing them, using books/magazines, or looking online). Ask which image should be first, and which comes next.

[Tip]: Label the images with words like "first" and "next".

**Intermediate:** Show your child three pictures that tell a story in a mixed up order. Ask your child to show which picture should be *first*, *next*, and *last*.

[Tip]: Label the images with words like "first, next, and last."

**Experienced:** Show your child five pictures that tell a story in a mixed up order. See if your child can order the pictures in a way that makes sense.

[Tip]: Label the images with words like, "first, next, then, after, and last."

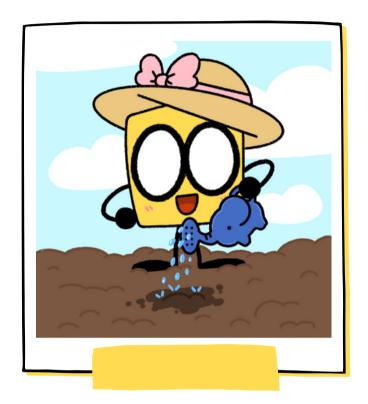

Why is this important? Understanding the order of events builds skills for reading and writing.
